

October 4, 2020

Dear Ivymount, Maddux and Outreach Families and Staff,

Our commitment amidst the COVID-19 pandemic is to notify families and staff when a COVID -19 related event has occurred. You will receive these COVID-19 Health Alerts related to the quarantine or isolation of staff members, students, clients, or individuals in their household. If the situation involves you, your students, or your family directly, you will receive additional communication.

Update as of 10.4.20

The Ivymount Outreach Early Childhood Clinic will be closed Monday through Wednesday as a preventative measure. At this point we have NO confirmed positive tests or known exposure to a positive case. However, this weekend two staff and one student reported some COVID-19-like symptoms and they are quarantining at home while working with their health care professionals. The clinic will be closed while we determine everyone's health, clean the classrooms as a precaution, and ensure no one else becomes symptomatic. The ECC staff did not participate in this weekend's Outreach on-campus event and worked only with ECC staff and students last week. We will notify the community if the situation develops further.

Recognizing that each situation is unique, we will continue to follow the guidance of the health department and our medical advisory team. Ivymount, Maddux, and Outreach continue to maintain best practices to mitigate the spread of COVID-19. Our building remains closed to all but essential staff, and we perform regular cleaning throughout the building.

We ask that you monitor yourself and your family's health and follow guidelines for wearing masks, washing hands, appropriate hygiene, and social distancing. Please consider getting a flu shot to help prevent the spread of the flu during this difficult time.

If you are working on-site or participating in an on-site activity or program, please contact Ivymount if you or a member of your immediate family have a confirmed case of COVID-19, are experiencing COVID-19 like symptoms, or have been exposed to someone who has tested positive.

Send a confidential email to the following address and we will follow up with you:

- Studentcovidreport@ivymount.org
- Staffcovidreport@ivymount.org

COVID-19 Health Alerts will be sent to all members of the Ivymount Corporation. This includes families and staff members of the Ivymount School, Maddux School, Outreach

Programs, and Corporate Departments to provide transparent communication, whether or not you or your program are affected.

Sincerely,
Susan Holt
Executive Director
